Title: Electrostatic Spray Device :

PRELIMINARY AMENDMENT

Commissioner for Patents  
Washington, D.C. 20231

Dear Sir:

Please preliminarily amend the above-identified application and consider the following remarks.

IN THE CLAIMS:

Please amend claim 13 as follows:

13. (Amended) An electrostatic spraying device being configured and disposed to deliver a product from a reservoir through a channel to a point of dispersal, to electrostatically charge the product via a high power electrode after the product has exited the reservoir and to dispense the product from an exit orifice of a nozzle, wherein said device comprises:

- a power source to supply an electrical charge; and
- a high voltage power supply, said high voltage power supply being electrically connected to said power source and configured to charge the high voltage electrode; and
- a high voltage resistor electrically connected to an output of the high voltage power supply to drain said stored charge of the high voltage power supply.

Please delete the second occurrence of claim 14 on page 18, lines 27-29.

Please renumber claim 15 to become claim 16 as follows:

16. (Amended) The electrostatic spraying device of Claim 1, further comprising a mechanical switch configured to drain a stored charge of the high voltage power supply when said high voltage power supply is deactivated.
